Profile

Full-Stack Software Engineer with hands-on experience building scalable web and mobile applications. Strong in React, Next.js, Node.js, and relational databases, with a focus on performance, clean architecture, and secure backend systems. Proven ability to ship production-ready features, optimize system performance, and lead end-to-end product development.

Experience

Full Stack Developer Intern – Ecoflitz (UK)

Jul–Oct 2025

- Built and deployed full-stack features using **Next.js, Node.js, and MySQL**, contributing to production-ready applications.
- Designed and implemented **JWT-based authentication** and role-based access control for secure user sessions.
- Collaborated in a remote Agile team using Git and Jira, contributing to feature planning and sprint delivery.

Founder & Full Stack Developer – Khuda Hafiz (Startup)

2025–Present

- Built a full-stack mobile and web platform for funeral service management using **React Native, Next.js, Node.js, and MongoDB**.
- Designed scalable backend architecture supporting multiple vendors, service packages, and real-time coordination.
- Integrated AI-powered chatbot and location-based features to enhance user experience and service accessibility.

Marketing Director – Google Developer Groups (Air University)

2024–2026

- Led marketing campaigns for large-scale tech events, increasing participation and engagement across the university.
- Managed digital content, branding, and outreach strategies across multiple platforms.

Sponsorship Lead – Microsoft Learn Student Ambassador Society

2025–2026

- Secured sponsorships and built partnerships with external organizations for technical events and workshops.
- Coordinated with internal teams to align sponsorship deliverables with event execution.

Projects

E-commerce Platform (Next.js, Node.js, MySQL)

- Developed a full-stack e-commerce system with authentication, product management, cart, and order processing.
- Designed relational database schema with optimized queries for efficient data retrieval.
- Improved performance through API and database optimizations, reducing load times and enhancing user experience.

Khuda Hafiz App (React Native, Node.js, MongoDB)

- Built a mobile application enabling real-time service coordination and vendor integration.
- Implemented modular backend structure supporting multiple service providers and dynamic workflows.
- Integrated chatbot and real-time location tracking features for enhanced usability.

CreepyLink – URL Shortener with Tracking (Next.js, PostgreSQL)

- Built a scalable URL shortening service with custom slug generation and redirect tracking.

- Implemented indexed database lookups and collision handling for efficient link resolution.
- Designed authenticated user flows for managing and tracking generated links.

AI Content Detection System (Browser Extension + PyTorch)

- Developed a browser extension for detecting AI-generated text using NLP-based inference.
- Built a CNN-based image classification pipeline using PyTorch for identifying synthetic images.
- Implemented real-time inference and confidence scoring for user-facing feedback.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, **Databases:** MySQL, MongoDB, PostgreSQL
Java

Frontend: React.js, Next.js, React Native

Tools: Git, GitHub, Docker, Postman, Jira, Figma

Backend: Node.js, Express.js, Flask

Core Concepts: REST and Fast APIs, Authentication & Authorization, Database Design, API Optimization, Full-Stack Architecture

Achievements

- Scored a percentile of 95.3% in NSCT conducted by HEC
- 1st Runner-up – Air University Incubation Center Startup Competition
- Participant – Hult Prize 2025 (Global Entrepreneurship Competition)

Education

BS Software Engineering

2022–2026 Air University, Islamabad
